

PIN POINTING YOUR STUDY
NEEDS WITH QUALIFIED
INVESTIGATOR SITES

RESEARCH NETWORK™

PROVIDING QUALIFIED INVESTIGATOR SITES SPECIFIC TO OUR CLIENTS CLINICAL STUDY NEEDS

The Elite Research Network identifies clinical study opportunities by connecting sponsors and contract research organizations with qualified investigators within our network.

The group, comprised of independently owned, multi-specialty sites, offers expertise in clinical studies across a broad range of therapeutic areas in all clinical phases. By locating appropriate studies that match our sites' capabilities and patient populations, our sites consistently meet or exceed enrollment goals.

Serving as a central point of contact for the network saves our clients time and resources by streamlining information to our sites in order to make informed decisions about which studies are most appropriate. This allows site identification, feasibility, and study start up to occur at an accelerated pace.

Flexibility

Because each study is different, our clients maintain strategic control of the site selection process. Once investigators from the network have been rapidly identified and prequalified to conduct a study in a certain indication, clients are given the flexibility to use as few or as many sites as needed for a particular study. Study start up documents such as confidentiality agreements, questionnaires, and a synopsis can be sent either to the central office to distribute to the appropriate sites or directly to each site.

Elite Research Network conducts Phase I studies at a number of our Phase I facilities throughout the United States, including:

- Bioavailability/Bioequivalence
- Dose Ranging (SAD, MAD)
- Drug Interaction
- Ethnicity Effect, including Japanese Bridging studies
- Food Effect
- First in Human
- Pharmacokinetics/Pharmacodynamics
- Pilot
- QTc
- Vaccine
- Special Population

True Partnership With Our Sites

Elite Research Network was cofounded with our sites to set up a central point of contact for our clients. There is no cost to our clients for our central services and all study related payments are made directly to the investigator sites.

About Our Sites

Sites within the network must meet and maintain certain entrance criteria. Each site has a dedicated research staff consisting of highly trained, board certified investigators, study coordinators, and patient recruiters. Sites have EDC capabilities, use central IRBs with start-up regulatory document turnaround time within 5 days or less, and are in full compliance with FDA, GCP, ICH, and IRB guidelines.

Therapeutic Areas:

Elite Research Network conducts studies in all phases of clinical development across a broad range of therapeutic areas, including:

- Allergy
- Anesthesiology
- Cardiology
- Dermatology
- Endocrinology
- Gastroenterology
- Infectious Disease
- Internal Medicine
- Metabolic Disorders
- Nephrology
- Neurology
- Oncology
- Ophthalmology
- Orthopedics
- Pain
- Pediatrics
- Podiatry
- Psychiatry
- Pulmonary/Respiratory
- Rheumatology
- Urology
- Vaccines
- Women's Health
